

Test headphone Prg 1A

The test headphone is used mainly in telecommunication for testing, error limitation and tracking of signals on lines.

Possible application areas:

- railways
- industry
- telecommunication

Features:

- test headphones, can be changed over from 600 Ohm to 10 kOhm
- with one prod
- with one crimp terminal

Technical data:

Switching position "RED"

d.c. resistance
impedance

600 W \sim /=
600 W

Switching position "GREEN"

impedance
d.c. resistance
impedance 300 - 3400 Hz
insertion loss
receiving reference equivalent 300 - 3400 Hz

10 kW
10 MW
 \geq 10 kW
< + 0.26 dB
 \leq + 4.3 dB

maximum permanent load
test headphone with connecting cable and prods
impact resistant plastic housing
rubber sponge earpiece
weight
colour

2 W

200 g
pebble grey similar RAL 7032

Part no.:

60223

Authorisations:

- CE - marking

Applications:

- for testing telephone lines
- for error limitation and tracking of signals on lines
